

WATER MANAGEMENT

Water-related challenges:

- Access to safely managed drinking water services
- Access to safely managed sanitation and hygiene
- Water stress
- Water-related disasters
- Proper industrial wastewater treatment

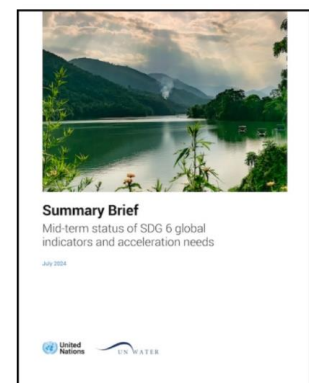

Objective:

Ensuring availability and sustainable management of water and sanitation for all

Examples of research issues:

- Integrated water resources management
- Capacity to balance competing demands across sectors
- Water-use efficiency
- Participation of local communities in water and sanitation decision-making
- Water management and transboundary cooperation
